Ring Master II - Make a Vase and Goblet

Instructor: Mark Hallbeck and Jeff Heffington

Prerequisite: Successful completion of the Ring Master I class (or approval of instructor based on student's proven ability to make a basic Ring Master Bowl without assistance). This is an Intermediate-to-Advanced class, intended to be taken after you have substantial experience using the Ring Master equipment.

Enrollment: Limited to a maximum of three, with a minimum of two.

Schedule: Once a month on the third Monday, starting at 1:00 PM lasting 3 hours. We will meet outside the Woodshop Library prior to each class, and finish in the Machine Room (verify dates and times using on-line wood club monthly calendar).

Student Materials to Buy & Prepare Prior to Class: None - the instructor will pre-purchase wood blanks for each student.

Description. The student will learn to work with angled and straight rings cut from 4 blanks. The class project will be to cut all the rings needed to make a **vase** and a **goblet**. Instruction will be given as to how to assemble, glue, and sand but it will be up to the student to finish the vase and goblet outside of class time. Working with multiple blanks will require that all students be familiar with marking and drilling the center of the blanks, cutting plugs, and measuring board thickness to determine proper cutting angles. After learning the skills in this class, you will find that many more projects are possible, so this class will open your mind to many other shapes that you may want to do.

Fee: $15 - this includes the instructor-provided wood blanks

Tools: Will be provided.
